- 1** Choose a room. (cardstock copy)
- 2** Choose an appropriate **color scheme** to meet the needs of the case study client & function of room. Refer to Ch 16 for definition and examples of the following color schemes: Monochromatic, Complementary, Split Complementary, Analogous, Triad, Warm, Cool, Neutral, Achromatic, Accented Neutral.
- 3** From the sample library choose a minimum of **4 material samples** based on your chosen color scheme for the room such as carpet, upholstery, paint, draperies, etc. Wrap the fabric samples around poster board as demonstrated in class, creating smooth, neat corners.
- 4** Color Scheme correctly identified. **Color** the photocopied picture with colored pencils. To achieve the right color, you may have to blend the colors of an area with more than one colored pencil. Accuracy and neatness are important. Finished colored picture should clearly show the location of samples and how you would carry out your color scheme.
- 5** Write a **client profile** describing the lifestyle of a potential client and why this room would appeal to him/her.
- 6** Write a **color rationale** for your color scheme choice and color locations.
- 7** **Word-process** the name for your room with the name of the color scheme (48-72 pt. font height), your name & material sample identification (24-36 pt.). Check spelling.
- 8** **Mount** the following neatly, attractively & securely: colored picture, word processing, material samples on the front of the 14"x 22 poster board, nicely organize & group.

Staple or tape the top of this completed paper to the backside of poster board.
